

Natural stone raised planter with specimen tree. The planter will be constructed of stone matching the pergola. Specieses of tree will be chosen for an early Spring Blossom, good year round colour and interest.

Possibly a Multi Stemmed Prunus Serrula or Crabapple Tree.

A sawn and sandblasted Natural paving will be used to give the paved area a sleek crisp feel.

Seating Area, created from Natural Stone filled Gabion Baskets, with cushion top. A matching low table will also be included.

Seasoned Log Boundary Wall

Stone Pergola, incorporating a rain water harvesting system feeding to the Water Feature. A pump will run during the show, allowing a gentle flow of water to simulate rain water being collected.

Selected Shrubs to give a strong deep green background colour, helping highlight blossoming flowers in the foreground. These will also help to provide key planting structure in the space. To include :

Prunus laurocerasus
Syringia vulgaris

Views →

Mixed Perennial Planting to give a lush and exuberant feel to the garden, along with early Spring blossom.

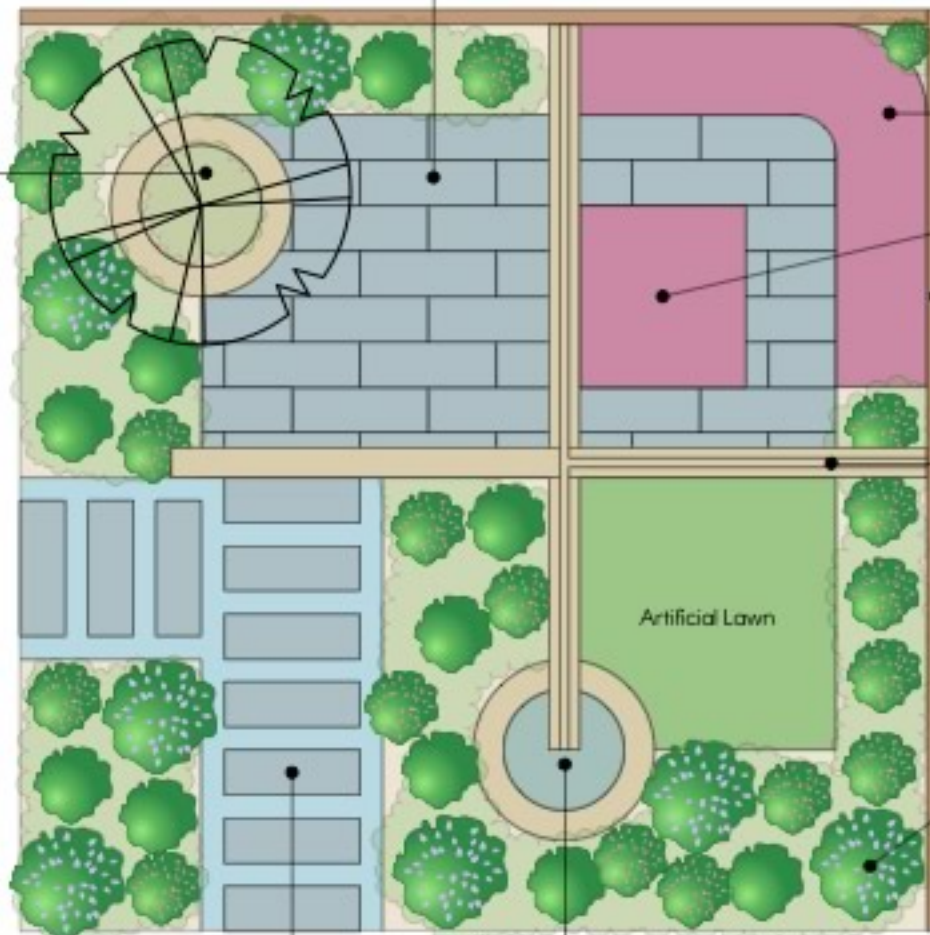

To include :
Lupins polyphylls
Delphinium
Phlox paniculata
Berginia coriflora

Simple accent plants, including Ammi majus, will be used to break up the pink and purple colour scheme. They will draw the eye through the garden, with the help from dashes of white.

Stepping Stones through a water pool

Raised Water Feature, doubling up as a water butt for the gardens storage.
