The Cubist Garden
by Zeno Perfetti (London College of Garden Design)

I wanted to emphasize the three-dimensionality of the garden, by fracturing it into geometric forms and by reproducing different perspectives. The soft natural beauty of the living walls has been combined with the red-orange metallic lustre of copper. The earth-toned colours of the gravel, the planter and the teak cubic seats add interest and uniqueness to the design, while the pink and bronze *Phormium* 'Jester' matches copper wonderfully.
